EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Natalie Davis on 08 March 2010.

2. The application has been amended as follows:

CLAIMS:

Claim 1:

On line 16, inserted after "predetermined time":

--, wherein said geomagnetic sensor detects earth-geomagnetism in a plurality of mutually perpendicular directions, and
said control unit does not perform said offset error correction processing if said predetermined time is not required from when at least one of the detection values of the earth-geomagnetism in said plurality of directions becomes a predetermined abnormal state to when all of the detection values of the earth-geomagnetism in said plurality of directions are no longer in said abnormal state,

said geomagnetic sensor converts an analog signal of earth-geomagnetism to a digital signal and outputs it as a detection value of the earth-geomagnetism, and
said predetermined abnormal state is a state where the detection value of said geomagnetic sensor becomes a maximum value or a minimum value of said digital signal,
said calculator is further provided with a display unit, and
said control unit calculates a geographical bearing based on detection values of said geomagnetic sensor and controls said display unit to display information of said calculated bearing--

Claim 2:

Canceled.

Claim 3:

Canceled.

Claim 4:

On line 1, replaced "claim 3" with --claim 1--.

Claim 5:

Canceled.

Claim 6:

On line 1, replaced "claim 2" with --claim 1--.

Claim 10:

On line 1, replaced "claim 2" with --claim 1--.

Claim 12:

On line 21, inserted after "predetermined time":

--, wherein said geomagnetic sensor detects earth-geomagnetism in a plurality of mutually perpendicular directions, and
said control unit does not perform said offset error correction processing if said predetermined time is not required from when at least one of the detection values of the earth-geomagnetism in said plurality of directions becomes a predetermined abnormal state to when all of the detection values of the earth-geomagnetism in said plurality of directions are no longer in said abnormal state,
said geomagnetic sensor converts an analog signal of earth-geomagnetism to a digital signal and outputs it as a detection value of the earth-geomagnetism, and
said predetermined abnormal state is a state where the detection value of said geomagnetic sensor becomes a maximum value or a minimum value of said digital signal,
said calculator is further provided with a display unit, and

said control unit calculates a geographical bearing based on detection values of said geomagnetic sensor and controls said display unit to display information of said calculated bearing--

Allowable Subject Matter

3 Claims 1, 4, and 6-12 allowed.

The following is the examiner's statement of reasons for allowance: The prior art fails to teach the claimed bearing calculator and claimed error correction method as recited in independent claims 1 and 12, particularly characterized by the claimed control unit for detecting and correcting the offset error, in combination with the remaining claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
